Silver-Guard™

Anti-Tarnish Reclosable Plastic Bags

Silver-Guard™ **Anti-Tarnish Reclosable Plastic Bag!**

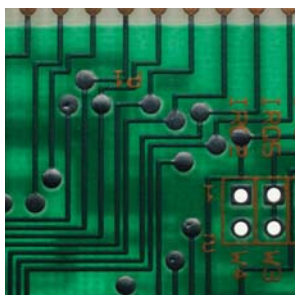

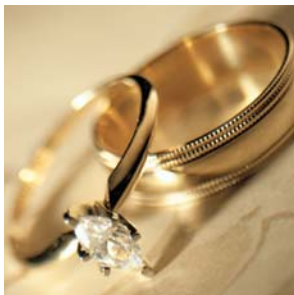

Commercial and industrial customers are clearly seeing the benefits of protecting their precious silver in new Silver-Guard™ anti-tarnish packaging. From music to electronics, more markets are discovering the benefits of reusable, reclosable Silver-Guard zipper bags for storing and packaging silver pieces, components and accessories.

Silver-Guard film works by removing all sulfide vapors from within a closed environment. The chemicals in Silver-Guard react with the vapors to eliminate the sulfide, and therefore eliminate the risk of tarnish. It works without risk of staining, discoloration, or affectivity conductivity. Silver-Guard film is safe, non-toxic, recyclable, and you can see the item inside without opening the bag.

Silver-Guard is popular not only for consumer items such as...

- Flatware
- Serving pieces
- Coins
- Heirlooms
- Musical instruments

...it also passes compatibility tests with copper, solder and other electronic components such as circuit boards. It does not affect conductivity or application of coatings.

Daubert Cromwell stocks 2 mil Silver-Guard™ zipper bags in a variety of popular sizes. Custom sizes are also available.

Silver Saver® **Anti-Tarnish Paper**

Silver Saver anti-tarnish paper is a chemically treated, bleached kraft paper formulated to prevent tarnish on silver, gold and other noble metals used in metal finishing, jewelry, cable and wiring and other industries. It works by absorbing hydrogen sulfide and other gases before they can react with the metal and cause tarnish. Vulnerable electronic components and metal assemblies stay clean while in long term storage and during export. Parts emerge completely ready to use without costly refinishing or further cleaning.

Simply wrap, envelope, bag or interleave the parts in Silver Saver, with the non-print side facing the metal. Airtight packaging is not required.

Silver Saver paper is available in stock and custom size rolls, sheets and bags.
